Subject: Limited deliveries to USSK during the transition to the new ERP.

Dear Contractor,

As part of our continued commitment to excellence and efficiency in our operations, we are approaching a key milestone - the deployment of SAP S4 HANA and SAP Ariba with a target go-live as of **1 January 2025**.

As the launch date of the new systems is approaching, we would like to inform you about the changes that are related to our business relationship and that affect our regular cooperation.

During the migration of our data to the new system, there will be a scheduled period of system freeze. During this period, some processes will be temporarily unavailable, and we will not be able to carry out certain activities. Therefore, we would like to inform you about the following dates:

- Between Saturday 21 December 2024 and Monday 13 January 2025, we request to minimize/freeze the delivery of materials and SP to USSK.
- Should the materials be delivered between 21 December 2024 and 13 January 2024, we request that information about such deliveries be sent to Central Receiving, so that we can successfully ensure the physical receipt of materials and the subsequent accounting of income at the closing date for the year 2024. For supplies that will be delivered in January **until 13 January 2025**, manual registration will be ensured at the Central Receiving and the entry of vehicles into USSK will be organizationally ensured in cooperation with SBS through individual gates.
- We ask all suppliers to accept this request to freeze deliveries between **21 December 2024** and **13 January 2025**, so that this does not cause unnecessary complications on both sides (supplier - customer) and thus also a potential increase in transport costs on the supplier's side. This instruction applies for deliveries of materials delivered by road transport registered at the Central Receiving.

We appreciate your cooperation and support in this important endeavor.
